Lee

Intellectual Property

Industrial Revolution

US Alone: \$7.1 trillion

Digital Property

[?] Revolution

Unknown total value

Bitmark does three main things:

- Creates property from digital things (by issuing bitmarks for a digital asset)
- 2. Protects your property rights (legally and technically) by ensuring provenance (Bitmark blockchain)
- 3. Allows for monetization of your digital property (sell, transfer)

The Bitmark System:

- 1. Independent blockchain, optimized for storing provenance (money can't have provenance, but property requires it)
- Does not have its own internal cryptocurrency (transaction fees are in bitcoin)
- 3. Properties are transferred using the BitTorrent protocol such that only owners can seed and download
